

Standard Breakers

High power breakers with a model to suit every application.
Reliability and robust construction make these breakers ideal partners to the range of power packs

- Progressive triggers, smooth controlled starting
- Excellent power to weight, ratios that deliver high performance
- External accumulators, Easy servicing
- Return Blow action which helps prevent the tool bit sticking in the work surface

FB11/20 Lightweight pick fitted with "D" handle and side grip is suitable for horizontal work on concrete and brickwork. Progressive controlled starting allows the operator to achieve accurate placement of the tool before engaging full power.

FB16/20, FB20/20 Medium duty breakers ideal for all-round site work and road repair.

FB25/20 Heavy duty breaker suitable for use in all types of construction and demolition work.

Breakers are designed to accept higher than normal back pressure, they are well suited to operate from hydraulic take-off points on construction equipment such as excavators, skid loaders and road rollers. Where necessary oil flow and pressure compatibility can be achieved with a simple control valve device.

	Blow Rate bpm	Flow l/min	Press. Bar	Steel Size mm	Weight kg	HAV m/sec ²	Order Code		
FB 11/20 Pick 'D' Handle and Side Grip	1700	18-20	98-138	22 x 82	11.5		94008		
FB 16/20 Breaker	1600	18-22	98-138	25 x 108	16		94000		
FB 20/20 Breaker	1600	18-22	98-138	25 x 108	20		94001		
FB 25/20 Breaker	1400	18-22	98-138	32 x 160	25		94002
